

International Hydrocephalus Imaging Working Group (IHIWG) Programming: Clinical Evaluation and Imaging of Ventriculostomy Tubes

Session Date: 6/4/2020

Session Time: 9:00-10:30 AM

Moderators			Pat McAllister
			Ari Blitz
			Mark Luciano
9:00 AM	9:30 AM	Keynote Address	Victor Haughton, MD
9:00 AM	9:30 AM	Keynote Address	Juan C Lasheras, PhD
9:30 AM	9:50 AM	Experimental Evaluation of Ventriculostomy Tubes	Carolyn Harris, MD
9:50 AM	10:10 AM	Clinical Indications for Ventriculostomy Tubes and Insights Into Causes of Failure: New Neurosurgical Observations	Bermans Iskandar, MD
10:10 AM	10:30 AM	High Resolution Imaging of Ventriculostomy Tubes	Ari M. Blitz, MD

International Hydrocephalus Imaging Working Group (IHIWG) Programming: Intracranial Hypertension: Pseudotumor Cerebri, Relation to Intracranial Hypotension and Beyond

Session Date: 6/4/2020

Session Time: 10:45 AM-12:15 PM

Moderators			Mark Wagshul
			Bryn Martin
			Harold ReKate
10:45 AM	11:05 AM	A Syndrome of Intracranial Hypertension During Space Flight? Evidence from Volumetrics	Donna R. Robert, MD
11:05 AM	11:25 AM	Automated MRI Based Quantification of Ocular Structural Changes and Recovery After Long-duration Spaceflight	Bryn Martin, PhD
11:25 AM	11:45 AM	Venous Stenting for Refractory Intracranial Pressure and Intracranial Hypertension as a Cause of Intracranial Hypotension: Looking Back and Looking Forward	Nicholas Higgins, FRCP FRCR
11:45 AM	12:05 PM	Spontaneous Intracranial Hypotension: Systematic Approach	Richard Farb, MD, FRCPC
12:05 PM	12:15 PM	Discussion: What Have We Learned and Where Do We Go From Here?	Harold ReKate, MD
